

# Dead wood samples

Name \_\_\_\_\_

Address \_\_\_\_\_

\_\_\_\_\_

Postcode \_\_\_\_\_

Phone number \_\_\_\_\_

Date \_\_\_\_\_

Species of wood in which larvae were found if known \_\_\_\_\_

Description of wood (e.g. fence post, tree stump) \_\_\_\_\_

Address where specimen was found if different from above \_\_\_\_\_

\_\_\_\_\_

Number of larvae found in wood \_\_\_\_\_

Size of larvae (*If possible, please attach digital photo of a larva with a ruler or coin as a scale*)

\_\_\_\_\_

Were the larva found above ground/ below ground/ within wood/  
in the soil associated with wood? \_\_\_\_\_

Were any adult beetles present with the larvae \_\_\_\_\_

If yes, how many and what size \_\_\_\_\_

Do you regularly see stag beetles in the summer?

\_\_\_\_\_

Wrap wood specimen (approximately the size of a large egg) in paper towel, or foil, but NOT plastic. Please send to: Dr Alan Gange, School of Biological Sciences, Royal Holloway, University of London, Egham, Surrey, TW20 0EX Thank you for your help
